# Nguyen Anh Le *Student, ICT*

anhle261137@gmail.com | Portfolio | LinkedIn | +31 6 40824942 | Hoorn, Nederland | 26-11-2004

## PROFILE

Software engineering student (Responsible AI semester) focused on AI, automation and data, with hands-on backend and frontend experience. Built generative AI and computer vision prototypes during a DevOps internship at Ahold Delhaize. Looking for a working student role in IT.

## LANGUAGES

Dutch | English

## PROFESSIONAL EXPERIENCE

**Ahold Delhaize | AH TechNL Labs,** DevOps Engineer Intern — 02/2026 – 07/2026
Built two generative AI prototypes for internal teams (computer vision, labeling automation). — Zaandam

**KLM Catering Services,** Productiemedewerker — 06/2025 – 02/2026
Loaded and unloaded aircraft, cleaned trolleys and equipment from returning flights, sorted items for reuse and prepared food. — Schiphol

## EDUCATION

**ICT,** Hogeschool van Amsterdam — 09/2022 – Present
Bachelor of Applied Science. Software engineering route; currently in the Responsible AI semester. — Amsterdam

**Havo,** Tabor College Oscar Romero — 2017 – 2022
Nature & Health profile (N&G). — Hoorn, Nederland

## SKILLS

**Web Development**
HTML/CSS, Vue, Bootstrap, Streamlit, Javascript, Typescript, React

**Programming & Scripting**
Python, Java, Kotlin, Spring Boot, Node.js, Express

**Databases**
SQL - *MySQL, PostgreSQL*

NoSQL - *MongoDB*

**Infra & DevOps**
CI/CD, Git, Docker, Kubernetes, ArgoCD, Azure

**AI & Machine Learning**
PyTorch, ONNX, Ollama, LLM integration, Tesseract OCR

## PERSONAL PROJECTS

**Does AI Bin It?** 2026
Waste-sorting game vs. image classifiers. PyTorch CNNs running in-browser via ONNX (90.8% accuracy).

**Invoice Parser** 2026
Developed an automated Python-based PDF parser for invoices and financial statements, leveraging Tesseract OCR and Ollama to extract a wide range of financial and invoice data, including amounts, dates, vendor names, VAT numbers, and other relevant details.

## SCHOOL PROJECTS

**ICT-praktijkzoeker** 2026
Search tool for IT students that labels each result for licence and reliability, using Python, NLP and model training & evaluation.

**Booomtag AI dashboard** 2025
Developing an AI-powered analytical dashboard using Python, Streamlit, Ollama, and MySQL to provide interactive data visualization and business insights.

**Election Results Site** 2024
Developed an election results dashboard with Vue, Spring Boot, JWT, Docker, PostgreSQL, and a real-time forum for user discussions.

**Student Casino** 2024
Built a dynamic gambling website with HTML, CSS, JS, PHP, and SQL, featuring coin-based gameplay and a virtual store for student items.

**Project Agile Development** 2023
Built an interactive dashboard for AUAS Open Day with Node.js, Express, JavaScript, Bootstrap, and Cypress, featuring an interactive map, FAQs, trial lesson sign-ups, and organizer management. Managed via GitLab.

**Corendon Travel Matching** 2022
Website that matches older travellers so they can fly together, built with HTML, CSS and JavaScript.
